

Hadleigh Infants and Nursery School

Calculation Policy Year 1

Addition

It is important that children's mental methods of calculation are practised on a regular basis and secured alongside their learning and use of written methods of addition.

There are some key skills that children need to help with addition, which include:

- Counting forwards in ones from any number.
- Recalling their addition facts for 10 and 20.
- Doubles to 20.
- Adding mentally a series of one-digit numbers ($5 + 8 + 4$)

Using and applying is a key theme and one of the aims of National Curriculum, it is important that their skills are broadened through their use and application in a range of contexts, these include:

- Missing number questions
- Using units of measure including money
- Word problems
- Open ended investigations

Mathematical vocabulary used in relation to addition

- Add
- Plus
- Altogether
- Total
- Sum
- Make
- More

Addition

Objects

$4 + 3 =$

Numicon

$6 + 1 =$

Pictures

$3 + 2 =$

Dots

$7 + 2 =$

Addition continued

0—20 Numberline

$12 + 7 =$

Dienes

$11 + 4 =$

0—30 Number square

$8 + 6 =$

1	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	17	18	19	20
21	22	23	24	25	26	27	28	29	30

Blank Number line

The children will draw a blank number line then complete the number line as they jump up in ones.

$13 + 4 =$

Subtraction

It is important that children's mental methods of calculation are practised on a regular basis and secured alongside their learning and use of written methods of subtraction.

There are some key skills that children need to help with subtraction, which include:

- Counting forwards and backwards in ones from any number.
- Recalling their number facts for 20 knowing their inverses.

($7 + 3 = 10$ therefore $10 - 3 = 7$ and $10 - 7 = 3$)

- Halves

Using and applying is a key theme and one of the aims of National Curriculum, it is important that their skills are broadened through their use and application in a range of contexts, these include:

- Missing number questions
- Using units of measure including money and time
- Word problems
- Open ended investigations

Vocabulary used in relation to subtraction

- Take away
- Minus
- Difference between
- Less
- Subtract

Subtraction

Objects

$$6 - 2 =$$

The children will count out the largest number of objects then physically take away the smaller number.

Pictures

$4 - 2 =$

Dots

$12 - 3 =$

Subtraction continued

0—20 Number Line

$$19 - 9 =$$

0 - 30 Number square

$$15 - 7 =$$

1	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	17	18	19	20
21	22	23	24	25	26	27	28	29	30

Blank Number line

The children will draw a blank number line then complete the number line as they jump back in ones.

$$14 - 5 =$$

Multiplication

It is important that children's mental methods of calculation are practised on a regular basis and secured alongside their learning and use of written methods of multiplication.

There are some key skills that children need to help with multiplication, which include:

- Counting in 2s, 5s and 10s
- Understanding multiplication as repeated addition
- Doubling

Using and applying is a key theme and one of the aims of National Curriculum, it is important that their skills are broadened through their use and application in a range of contexts, these include:

- Missing number questions
- Using units of measure including money and time
- Word problems
- Open ended investigations

Vocabulary used in relation to multiplication

- Times
- Groups of
- Lots of
- Repeated addition
- Multiple of
- Multiplied by

Multiplication

Objects

$2 \times 4 =$

Pictures

$5 \times 3 =$

$3 + 3 + 3 + 3 + 3$

Arrays

$2 \times 6 =$

Division

It is important that children's mental methods of calculation are practised on a regular basis and secured alongside their learning and use of written methods of division.

There are some key skills that children need to help with division, which include:

- Counting in 2s, 5s and 10s
- Halving
- Recalling division facts

Using and applying is a key theme and one of the aims of National Curriculum, it is important that their skills are broadened through their use and application in a range of contexts, these include:

- Missing number questions
- Using units of measure including money and time
- Word problems
- Open ended investigations

Vocabulary used in relation to division

- Share
- Equal groups of
- Share equally
- Divide

Division

Objects

$$10 \div 2 =$$

10 objects shared equally between 2 groups.

Pictures

How many groups of 2 can you make from a set of 6 apples?

$$6 \div 2 =$$

Arrays

$$9 \div 3 =$$
