

What things can you find around your house that make a noise?

Did you find things that you could hit to make a noise, or something you shake?

Make a sequence of sounds using things you have found around your house.

You could use saucepans and spoons, you could put some rice or pasta in a pot (with a lid) and shake it.

For example:

You might hit the saucepan, then shake the pasta, then shake the rice, and hit the saucepan again, starting your sequence again.
